

Full Stack Developer – India

Description

We are a fast-growing Enterprise Software company headquartered in Norwalk, CT, and has offices in Scottsdale, AZ, and Bangalore, India. We deliver cutting-edge AI solutions to some of the top universities and enterprises in India and the USA. We built outstanding products to simplify site search and enable active conversations. As a member of our team, you shall collaborate closely with other developers and stakeholders to create innovative solutions for our customers. Our technology stack includes Cloud platforms, NodeJs, Bootstrap, JavaScript, PHP, etc. We follow Agile methodologies to quickly iterate and deliver new features.

We are looking for a passionate, talented, and motivated Full Stack Developer to join our team and help deliver high-quality technical solutions. If you're excited about working on the newest technologies and delivering value with a sense of ownership, then you should join us.

Responsibilities

- Write clean code that follows industry standards and best practices.
- Participate in architectural discussions to improve our technology stack.
- Innovate ideas to promote best practices
- Work closely with cross-functional stakeholders to make collaboration better between teams.
- Deliver high-quality and maintainable code using test-driven methodologies.
- Participate and contribute towards improving the development process and practices within the team and across the organization.

Qualifications

- 3 to 6 years of industry experience. developing on the full stack.
- Strong experience in HTML 5, CCS 3, Media queries, bootstrap 4 SCSS.
- Experience with RESTful services.
- Must have experience in Vue.JS VUE CLI, Nuxt, or Gridsome.
- Knowledge and experience in building scalable Node.js applications.
- Should be able to leverage bootstrap core classes and build responsive applications.
- Continuous integration/continuous deployment experience.
- Experience with building tools such as webpack, grunt, gulp, babel, etc
- Strong desire to learn and share knowledge with others.

Job Benefits

The fun part – Enjoy the benefits of Paytm food wallet, Cult fitness, Uber, Metro commuting benefits, Movie pass, Vacation time off, and much more. Never miss an exciting Hackathon which has been conducted annually for creative minds to showcase their talent and innovate solutions for worldwide problems through technology.
