

QA Automation Engineer

Description

OneOrigin is one of the fastest-growing Technology Companies in the world, headquartered along the coastline of North East America, in Norwalk, Connecticut. With a mission to deliver value through astounding focus and exceptional innovative mindset, OneOrigin is empowering the technology shift within the Education sector from a reactive state to a proactive spirit.

Founded in 2015, OneOrigin has an international footprint with a Global Solution Delivery unit at SkySong Innovation Center in Scottsdale, Arizona, and Global Development Center in Bangalore, India. Dedicated to innovation, OneOrigin designs and delivers cutting-edge products & solutions around Artificial Intelligence, Data & Analytics, Rapid Web Development, Virtual & Mixed Reality, and Cloud Computing, guiding the path to a meticulous Digital Transformation for its customers.

With its State-of-the-Art products, Sia™ and SpotSearch™, OneOrigin is part of an Elite Disrupt companies list, alongside being featured on well-known technology forums such as TechCrunch, GSV, and Educause.

We are looking for a passionate, talented, and motivated QA Automation Engineer to join our team and help deliver high-quality technical solutions. If you're excited about working on the newest technologies and delivering value with the sense of ownership, then you should join us.

Responsibilities

- Work as part of a cross functional, passionate agile project team to ensure quality is driven into the heart of the development process from requirements definition through to delivery.
- Designing, developing and supporting frameworks for our test infrastructure and providing automation expertise to our development teams.
- Contributing toward predictable delivery of quality releases.
- Research, recommend and implement tools as needed with the goal of increasing automation.
- Mentor team members on automation.
- Proactively bringing issues and problems to the attention of the team; generating, proposing and implementing innovative solutions to solve them.
- Be meticulous about documentation and maintaining a robust log of all test cases and test results.
- Ensure that all tests are executed and give regular feedback to the team lead on the status of quality.
- Use appropriate measures and KPIs to validate and report on software quality.
- Work closely with the software engineering team, Product Management and Technical Operations as well as business users and Senior Management, as required.
- Be a creative thinker who can quickly identify and test for functional 'edge cases' outside of expected functionality workflow.

Qualifications

- Strong background working in tooling or QA automation for at least 3+
